

## INVITATION TO SPONSORSHIP AND EXHIBITION

10th Nordic Grouting Symposium 2023 in Stockholm Sweden  
September 12-13, 2023

### **Dear Business Leader**

The Swedish Rock Engineering Association with the endorsements of ISRM, ITA and BeFo - Rock Engineering Research Foundation, has the honor to arrange and organise the 2023 Nordic Grouting Symposium in Stockholm Sweden.

We would like to invite you to become a sponsor. Your sponsorship will help us lower the barrier of entry, thus helping young professionals to attend and to be able to share the visions and experience together with the best in the field of Rock Grouting. It will also guarantee you and your organisation participation in this event while in return providing an opportunity to prominently display your brand to the top thinkers, engineers, content providers, and innovators.

The symposium aims at presenting and discussing new development related to rock grouting in a broad sense and related to seven different topics, see [www.ngs2023.se](http://www.ngs2023.se). This is also the 10<sup>th</sup> time this Nordic event is arranged.

The event is a specialist symposium for learning and development and expect to welcome some 100-150 participants. Professionals of knowledge and co-working in their organisations. From CEO to specialist, from dean to student, NGS 2023 welcomes people from not only the Nordic Countries. Learning is a key driver in companies big and small. At NGS 2023, we typically bring leading universities, companies, contractors, consultants, machine- and material manufactures to share what they are doing and learning to help grow businesses of all sizes.

You will benefit from the collective experience, wisdom, and expertise of those who face similar challenges while expanding your personal and professional network.

Please find enclosed our sponsor and exhibition offer. Please contact Patrik Vidstrand, from the Organising Committee, +46 70 141 89 88 for further discussion and information of sponsoring offers.

Sincerely

Thomas Dalmalm

Chairman of the Organising Committee

*An event endorsed by*

*An ISRM Specialized Conference*
